Outreach Queue

AgriPartners orders the outreach queue by probability of response, relevance to Alpha v1.2, and ability to support founder success, ecosystem access, partnerships, or technical feedback. The priority is meaningful ecosystem engagement and relationship building, not contacting the highest-ranking executives first. Executive visibility contacts should mainly be followed and engaged through posts until AgriPartners has stronger ecosystem visibility.

Send queued connection requests without a note unless the next action says otherwise.

Follow-Up Template

Hi [Name], just following up in case this is relevant. I am building AgriPartners, an Alpha v1.2 platform on NEAR Testnet for transparent agricultural investment workflows. I would value a short feedback conversation if this connects with your work.
