

UZBEKISTAN FEEDLOT OPERATOR GUIDE

Feedlot livestock fattening

v5.9 · Demonstration economics · 60/40 model · fiat-only Uzbekistan operations

Mandatory boundary: the External Investor contracts only with AgriPartners OÜ in Estonia. Approved crypto, if any, stops in Estonia and is converted through approved infrastructure. The Uzbekistan Feedlot Operator receives and returns fiat only under a separate written Operator Agreement.

Illustrative Alpha v1.2 model. Projections are not guaranteed returns, are not a public offer, and require legal, tax, banking, accounting, compliance, operational, and partner review before any real-money pilot.

Metric	Value
Projected operator cash	\$96,250
Projected property transfer	\$18,000
Projected total benefit	\$114,250
Cycles / duration	7 / 35 mo.

Illustrative use of initial capital

Item	Amount
Initial livestock	\$20,000
Feedlot facility	\$18,000
Working reserve	\$12,000
Total	\$50,000

Condensed cycle economics

Phase	Revenue	Net pool	Investor cash	Operator cash
Cycles 1–2	\$50,000	\$30,000	\$9,600	\$15,250
Cycles 3–7	\$50,000	\$26,500	\$8,480	\$13,150
Completion	—	—	\$20,400	\$10,000

AGRIPARTNERS

Roles and authoritative evidence

Feedlot livestock fattening · v5.9

Role	Responsibility and evidence
External Investor	Contracts with and funds AgriPartners OÜ; no direct transfer to Uzbekistan.
AgriPartners OÜ	Legal counterparty; conversion, banking, accounting, reconciliation and governance.
Uzbekistan Feedlot Operator	Separate agreement; fiat receipts and returns; operational delivery and evidence.
Farmer product role	Operational reports and confirmations only; no wallet, crypto receipt or on-chain payment duty.
NEAR Testnet	Demo audit and automation on the Estonia/investor side; never replaces authoritative records.

Assumptions, controls and risks

Area	Position
Model	Illustrative prices, quantities, costs, timing, 60/40 split and 20% performance fee.
Reserve	Exploratory protection reserve; not insurance or a guarantee; release may stop after loss, default, missing reports or dispute.
Evidence	Signed agreements, bank/payment records, invoices, accounting and reconciliation remain authoritative.
Risks	Animal health, mortality, feed and market prices, FX, execution, counterparties, regulation and liquidity.

Before a real pilot

- Approve company, banking/payment, accounting, compliance and crypto-to-fiat providers.
- Execute separate Investor and Operator agreements after qualified legal review.
- Validate assumptions with a named operator, suppliers, veterinary controls and local evidence.
- Use Alpha v1.2 only as a Testnet workflow demonstration until formal pilot approval.

Source: AgriPartners 60/40 model. Simple annualized ROI equals total ROI divided by model duration; it is not APR or IRR.
